## EXPERIENCE

### Senior DevOps

#### BedRock

Nov 2019 - Ongoing France, Lyon

#### Data Infrastructure Team at Bedrock

Bedrock is building streaming platforms (like netflix) the most know customers are currently Salto (new french SVOD platform) and 6play(M6 TV channel)

I am the Data infrastructure needed to handle SVOD data (medias and user tracking) aws + EMR for data platform airflow as a scheduler, dataviz by Superset.

We migrate from a POC to a complete EKS managed solution, scalable and reliable, monitoring with prometheus and aws cloudwatch, did some PRs to superset.

We manage to transform and orchestrate the infrastructure to scale more and multiply it for every customer, leveraging a lot of terraform and kubernetes.

- from POC to automatic deployment
- Went from 1 to 10 customer in one year.
- Evolving from a 2 hour deployment to 2 seconds (k8s)

## EXPERIENCE MODJO

*"Sharing is caring, be active in the communities"*

## MOST PROUD OF

 **team player**  
always full of ideas to improve our work

 **Persistence & Loyalty**  
I showed despite the hard moments and my willingness to stay after the acquisition

 **data evolution**  
from a POC to a multiple customer infrastructure

 **handle 3 Kids**  
take care of my autistic and disabled kid without impacting my work

## STRENGTHS

lots of ideas highly skilled in data

highly skilled in infrastructure

Data Kubernetes Migrations POCs

Research & Development

## LANGUAGES

Terraform

Shell

Golang

Python
