EXPERIENCE - HOLIMETRIX

Holimetrix is a company focus on drive to web: measuring the rate of TV ads viewers who are converted to internet users.

deputy CTO

Holimetrix

Mar 2014 - Apr 2018 France, Lyon

As a deputy CTO, I took care of

- defining the data exchange strategy and details with partners
- project management, deliverability
- designing technical solutions
- team management

Lead DevOps

Holimetrix

Mar 2014 - Apr 2018 France, Lyon

Our job was to Aggregate data from our web trackers to our on-premise hadoop cluster, then deliver the data to our angular portal in near real time.

- from nothing to webserver handling thousands of request per second without CDN
- created all the infrastructure as a code with saltstack and ansible
- monitored heavily the web servers and data streaming platform
- tested lots of technologies quickly (startup rush) GCP aws, hadoop distros
- migrate to aws, then migrate back to On Premise(to reduce costs by a 4 factor)
- built a TV advertising recognition system from scratch (image and sound recognition)

TYPICAL WEEK

EXPERIENCE MODJO

"Startup + data + nginx rocks"

MOST PROUD OF

team player
from 3 to 18 person, adapting our ways of workings

Persistence & Loyalty
Gone through rough times with a limited team, but achieve rentability at the end

no downtime
Our tag was integrated on many big sites like Renault, VW, Jaguar, we didn't suffered any downtime in 4 years

STRENGTHS

go fast nginx web tracking

Startup = I can/will do anything

BIG Data 4TB MySQL infrastructure as code
Migrations POCs image recognition
