## **EXPERIENCE - YOGOSHA**

#### Senior DevOps

#### Yogosha

Nov 2021 - Ongoing

France, ..anywhere..

Infrastructure Team at Yogosha

Yogosha is a french Bug Bounty startups with many clients around the world and a strong community.

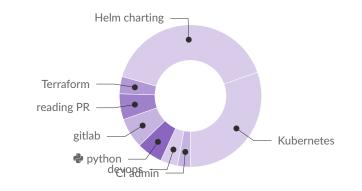

Since 2021 I'm playing a pivotal role as a DevOps engineer at Yogosha bug bounty company, leading the transition from a complex 15-machine deployment to a simplified and more streamlined solution using Kubernetes and Helm charts.

Deployment time as streched from 6 months to 1 week due to this

Using widely known open source software, and focusing a lot on containerization, I ensured the isolation and security of the deploved software.

- from POC 15 host to 1 kube
- managed to deploy this solution is 6 IT big players company around the globe
- Evolving from a 6 months deployment to 1 week (k8s)

## TYPICAL WEEK

### REFERENCIES

#### Boris Zanetti - Head of IT

- Yogosha

Yogosha

Paris France Eric Dupre - CTO

- Yogosha

Yogosha Lyon France

## **EXPERIENCE MODJO**

"Be proactive about security"

## MOST PROUD OF

#### robustness

the solution work very well

#### Persistence & Loyalty

Managed to guess what needed to be done without people asking in a very fast evolving environment.

## Coworkers

Working with a pack of really skilled persons and being part of them.

#### Overnight migrations

In startups you have jobs for 2 of you, the 2nd you is living during the nighttime.

## **STRENGTHS**

lots of ideas highly skilled in kubernetes highly skilled in infrastructure

Security

Helm

Migrations

Python

## **LANGUAGES**

Kubernetes

**Terraform** Shell

Golang

Python Helm

# **EXPERIENCE - BEDROCK**

### Senior DevOps BedRock, ex M6

Nov 2019 - Ongoing

France, Lyon

Data Infrastructure Team at Bedrock

Bedrock is building streaming platforms (like netflix) the most know customers are currently Salto (new french SVOD platform) and 6play(M6 TV channel)

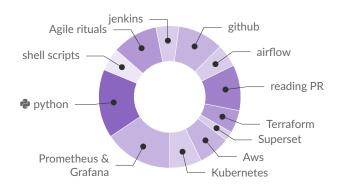

I am the Data infrastructure needed to handle SVOD data (medias and user tracking) aws + EMR for data platform airflow as a scheduler, dataviz by Superset.

We migrate from a POC to a complete EKS managed solution, scalabe and reliable, monitoring with prometheus and aws cloudwatch, did some PRs to superset.

We manage to transform and orchestrate the infrastructure to scale more and multiply it for every customer, leveraging a lot of terraform and kubernetes.

- from POC to automatic deployment
- Went from 1 to 10 customer in one year.
- Evolving from a 2 hour deployment to 2 seconds (k8s)

## TYPICAL WEEK

## **REFERENCIES**

#### Adrien Chaussende - Team technical leader

## **EXPERIENCE - HOLIMETRIX**

Holimetrix is a company focus on drive to web: measuring the rate of TV ads viewers who are converted to internet users.

## deputy CTO

### **Holimetrix**

**Mar 2014 - Apr 2018** 

France, Lyon

As a deputy CTO, I took care of

- defining the data exchange strategy and details with partners
- project managment, deliverability
- designing technical solutions
- team management

### Lead DevOps

#### Holimetrix

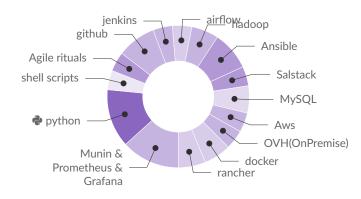

**Mar 2014 - Apr 2018** 

France, Lyon

Our job was to Aggregate data from our web trackers to our onpremise hadoop cluster, then deliver the data to our angular portal in near real time.

- from nothing to webservers handling thousands of request per second without CDN
- created all the infrastrucutre as a code with saltstack and ansible
- monitored heavily the web servers and data streaming platform
- tested lots of technologies quickly (startup rush) GCP aws, hadoop distros
- migrate to aws, then migrate back to On Premise(to reduce costs
- built a TV advertising recognition system from scratch (image and sound recognition)

## TYPICAL WEEK

## **EXPERIENCE MODJO**

"Startup + data + nginx rocks"

## MOST PROUD OF

# team player

from 3 to 18 person, adapting our ways of workings

### Persistence & Loyalty

Gone through rough times with a limited team, but achieve rentability at the end

# H no downtime

Our tag was integrated on many big sites like Renault, VW, Jaguar, we didn't suffered any downtime in 4 years

## STRENGTHS

go fast nginx web tracking Startup = I can/will do anything

**BIG** Data 4TB MySQL infrastructure as code Migrations **POCs** image recognition

## **LANGUAGES & TECHS**

Ansible Saltstack			•	•	•
С		•			•
MySQL					
raw PHP					
Lua					
Python					
PHP symfony					
vanilla javascript					
Bash

# **EXPERIENCE - BRAINSONIC - DEVOPS**

Brainsonic was a company focus WebTV hosting: hosting hundreds of video websites and encoding videos (before youtube erased the market)

DevOps & SRE

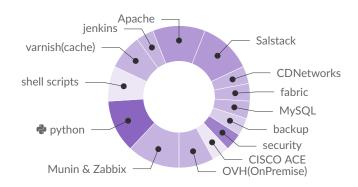

Brainsonic - DevOps & SRE

**Apr** 2010 - Mar 2014

France, Paris, Lyon

- from 30 to 100+ web servers all automated (saltstack)
- managed the It department
- built an video encoding farm (30 hosts)
- exchanging a lot with developers to make the servers meet their
- automatize everything using APIs (OVH, googledoc, CDNetworks...)
- VM hosting
- Azure
- TB (back in 2012..) of videos hosting

## TYPICAL WEEK

## REFEREES

Laurent Piroelle - co-worker

- @ Brainsonic DevOps & SRE

now claranet

France

Ludovico Gardhengi - co-worker

- @ Brainsonic DevOps & SRE

now Google France

# **EXPERIENCE MODJO**

"Web servers deployment in a matter of minutes"

## MOST PROUD OF

team player

working close to web developpers all the time

Persistence & Loyalty

always available when server had issues

Music

(web) Hosted a live Placebo concert in Paris

budget effective

Hosting lots of website on a budget, even some high traffic without CDN leveraging Varnish

got my first kid

Got a kid and leave Paris for Lyon

## STRENGTHS

web hosting | video hosting in 2014 CDN MySQL clusters Streaming, live diffusion

DevOps

web development have a smart budget

# **LANGUAGES & TECHS**

**CISCO** Saltstack MySQL Bash

Varnish **Python** PHP symfony CDN

managing issues

## **EXPERIENCE - RTE**

RTE is a french Energy company, my department ws in charge and Research around electricity consumption prevision.

### DevOps & SRE

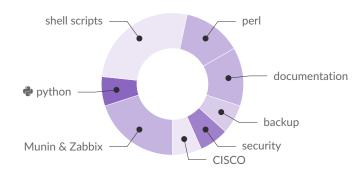

### RTE

**Mar 2055 - Apr 2010** 

France. Paris

- managed computing clusters OnPremise
- multi UNIX hosting
- high speed computing development(before big data exist)
- authentication servers / file servers
- work with a team of 100 Research engineers
- VM hosting, local network, fibe channel..
- C++ and perl development

## TYPICAL WEEK

## REFEREES

#### Xavier Droniou - manager

RTE

now Orange Business, France

#### Vincent Lefieux - co-worker

RTE

✓ vincent.lefieux@rte-france.com

RTE, France

## **EXPERIENCE MODJO**

"We can compute anything"

## MOST PROUD OF

# Authentication

rebuilt the authentication system, migrate from Solaris to Linux LDAP

#### Persistence

from developper to a team leader and main DevOp, I raised the hand and said I could do the job, and I could.

#### budget management

buying and negotiating for servers, routers, NAS...

#### young but tech ready

tech lead of 6 people older than me (I was 24)

## STRENGTHS

computing

working with engineers of different fields

managing issues DevOps have a BIG budget

ticketing

## LANGUAGES & TECHS

**CISCO** Linux

**Solaris** 

Squid reverse Windows AD servers

perl

C++

bash
