EXPERIENCE

Senior DevOps

BedRock

📅 Nov 2019 – Ongoing   📍 France, Lyon

Data Infrastructure Team at Bedrock

Bedrock is building streaming platforms (like netflix) the most know customers are currently Salto (new french SVOD platform) and 6play(M6 TV channel)
I am the Data infrastructure needed to handle SVOD data (medias and user tracking) aws + EMR for data platform airflow as a scheduler, dataviz by Superset.

We migrate from a POC to a complete EKS managed solution, scalabe and reliable, monitoring with prometheus and aws cloudwatch, did some PRs to superset.
We manage to transform and orchestrate the infrastructure to scale more and multiply it for every customer, leveraging a lot of terraform and kubernetes.

- from POC to automatic deployment
- Went from 1 to 10 customer in one year.
- Evolving from a 2 hour deployment to 2 seconds (k8s)

TYPICAL WEEK

REFEREES

Adrien Chaussende - Team technical leader

EXPERIENCE MODJO

"Sharing is caring, be active in the communities"

MOST PROUD OF

team player
always full of ideas to improve our work

- -

Persistence & Loyalty
I showed despite the hard moments and my willingness to stay with Yahoo after the acquisition

- -

data evolution
from a POC to a multiple customer infrastructure

- -

handle 3 Kids
take care of my autistic and disabled kid without impacting my work

STRENGTHS

lots of ideas   highly skilled in data

highly skilled in infrastructure

- -

Data   Kubernetes   Migrations   POCs

Research & Development
