EXPERIENCE - RTE

RTEis a french Energy company, my department ws in charge and Research around electricity consumption prevision.
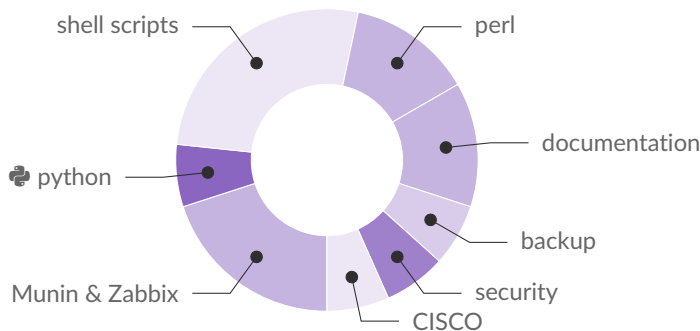

DevOps & SRE

RTE

📅 Mar 2055 - Apr 2010   📍 France, Paris

- managed computing clusters OnPremise
- multi UNIX hosting
- high speed computing development(before big data exist)
- authentication servers / file servers
- work with a team of 100 Research engineers
- VM hosting, local network, fibe channel..
- C++ and perl development

TYPICAL WEEK

- shell scripts
- perl
- documentation
- backup
- security
- CISCO
- Munin & Zabbix
- python

REFEREES

Xavier Droniou - manager
@ RTE
✉ raviere29@gmail.com
now Orange Business, France

Vincent Lefieux - co-worker
@ RTE
✉ vincent.lefieux@rte-france.com
RTE, France

EXPERIENCE MODJO

"We can compute anything"

MOST PROUD OF

Authentication
rebuilt the authentication system, migrate from Solaris to Linux LDAP

Persistence
from developper to a team leader and main DevOp, I raised the hand and said I could do the job, and I could.

budget management
buying and negotiating for servers, routers, NAS...

young but tech ready
tech lead of 6 people older than me (I was 24)

STRENGTHS

computing | working with different fileds engineers
Streaming, live diffusion

DevOps | managing issues | ticketing
have a BIG budget
