EXPERIENCE

Senior DevOps

Yogosha

📅 Nov 2021 – Ongoing   📍 France, ..anywhere..

Infrastructure Team at Yogosha

Yogosha is a french Bug Bounty startups with many clients around the world and a strong community.

Since 2021 I'm playing a pivotal role as a DevOps engineer at Yogosha bug bounty company, leading the transition from a complex 15-machine deployment to a simplified and more streamlined solution using Kubernetes and Helm charts.

Deployment time as streched from 6 months to 1 week due to this work.
Using widely known open source software, and focusing a lot on containerization, I ensured the isolation and security of the deployed software.

- from POC 15 host to 1 kube
- managed to deploy this solution is 6 IT big players company around the globe
- Evolving from a 6 months deployment to 1 week (k8s)

EXPERIENCE MODJO

"Be proactive about security"

MOST PROUD OF

robustness
the solution work very well

Persistence & Loyalty
Managed to guess what needed to be done without people asking in a very fast evolving environment.

Coworkers
Working with a pack of really skilled persons and being part of them.

Overnight migrations
In startups you have jobs for 2 of you, the 2nd you is living during the night-time.

STRENGTHS

lots of ideas   highly skilled in kubernetes
highly skilled in infrastructure

Helm   Kubernetes   Migrations   Python
Security
